SECTION – A (Reading)**20 Marks**

1. (a) Read the passage given below and answer the questions that follow : **12 marks**

The elephant's trunk is its most intriguing organ. Primarily it is a nose for breathing, it is also a hosepipe capable of sucking and blowing liquids when drinking and showering. It can collect dust to blow over the body. It serves as a trumpet and a sounding board. It picks up scent very easily. As a highly flexible working tool it is almost as much useful as a human hand. Elephants can tear up grass, bang the dirt off the roots, and convey it to their mouths with their trunks.

The trunk is used by the elephants to select fruits or break off branches. With great ease they can hoist huge logs or pick up small coins, placing both with delicate accuracy. Trunks are used to greet and caress fellow elephants. They can also function as weapons of attack, but in a serious situation an elephant will coil its trunk out of the way – it is too valuable to risk it being injured.

At what date people began taming and using elephants is lost in the mists of time. Perhaps orphan baby elephants were found and cared for in ancient Mesopotamia, the source of most of our domestic animals. They quickly became tame and lived like family pets. It is easy to imagine that people found they could ride on them and teach them to obey orders. Even adult elephants can be quickly trained.

Elephants have a prominent place in ceremonials in India. Maharajas emphasized their lofty role as they rode in state in lavish howdahs mounted on the backs of big elephants, moving with dignity among their cheering people, and followed by their family, courtiers and other nobles on dozens more elephants. Perhaps the greatest such spectacle was the annual Dussehra procession in Mysore. The procession is still a major attraction, although it is not quite so splendid in present-day India. Maharajas have been abolished, and an image of the local Goddess is mounted on the star elephant.

In the southern state of Kerala, elephants can be seen in many places. Hindu temples often keep elephants, which take part in ceremonials and parades. At the inauguration of industrial plants, decorated elephants are lined up with riders standing on their backs holding aloft great umbrellas.

Nothing compares to exploring the jungle on an elephant, observing other wild animals from close quarters. Guided mainly by the feet of the mahout, the great animal wades through rivers so deep you have to lift your feet to stay dry. The elephant raises its trunk above the surface to breathe, like the snorkel of a submarine. It pushes through grass towering above riders' heads, and a threatening branch in the forest is easily broken off on a brief command from the mahout.

Keeping domestic elephants is no longer common because roads have been built in formerly wild country where they were the only means of transport. But some people still keep them for old time's sake or as a status symbol. They may lend them or hire them out for a bridegroom to ride in the marriage procession to his bride's home.
