

**Class: VI**  
**Subject: Biology**  
**Topic: Water**  
**No. of Questions: 25**

- Q1. About 70% of our body consists of
- A. Bone
  - B. Muscles
  - C. Water
  - D. Minerals
- Q2. Which one is a common source of drinking water?
- A. Sea water
  - B. Ocean water
  - C. Spring water
  - D. River and lake
- Q3. No rain or very less rain causes
- A. Flood
  - B. Drought
  - C. Soil fertile
  - D. Soil unfertile.
- Q4. Which one is a renewable source of water?
- A. Forest
  - B. Coal
  - C. Water
  - D. Petrol
- Q5. The purest form of water is
- A. Spring water
  - B. Subsoil water
  - C. Rain water
  - D. Hand pump water
- Q6. Water is a /an
- A. Element
  - B. Compound
  - C. Mixture
  - D. Solution

- Q7. The process of changing water vapour into water is called
- Evaporation
  - Boiling
  - Condensation
  - Sedimentation
- Q8. Match the following
- | Column A                         | Column B                    |
|----------------------------------|-----------------------------|
| A. Pertaining to sea water       | i. water table              |
| B. Problem due to heavy rain     | ii. Sustainable development |
| C. Another form of well          | iii. Saline water           |
| D. Wise use of natural resources | iv. Tube well               |
| E. The level of ground water     | v. flood                    |
- Q9. Fill in the blanks.
- Water is a universal\_\_\_\_\_.
  - Water is essential for survival of \_\_\_\_\_ on earth.
  - Rain water is the \_\_\_\_\_ form of water.
  - Circulation of water between earth surface and atmosphere is called\_\_\_\_\_.
  - \_\_\_\_\_ is the wise and careful use of resources.
- Q10. What is flood? What is its main cause?
- Q11. What is gravitational water?
- Q12. Write three things you can do to save water.
- Q13. Classify the following as fresh water and saline source of water.  
rain water, sea water, river water, underground water, ocean water, ponds, well water, and spring water.
- Q14. Match the following
- | Column A   | Column B                  |
|--|---------------------------|
| A. Percentage of water in human body             | i. precipitation          |
| B. Rainwater harvesting                          | ii 70%                    |
| C. Condensation of water vapour into water       | iii. Sea water            |
| D. Floods  | iv. Conservation of water |
| E. Presence of large quantity of dissolved salts | v. Natural calamity       |

- Q15. Write T for true and F for false statements.
- Sea water cannot be used for drinking and industries.
  - Presence of soluble salts makes sea water saline.
  - Water found in rivers and ponds is saline in nature.
  - Water gets polluted by the addition of industrial waste and sewage to it.
  - The three - fourth of the earth's surface is covered by water.
- Q16. What is underground water?
- Q17. What do you understand by rain water harvesting?
- Q18. Write three factors that are affecting the shortage of water.
- Q19. What is water pollution? Mention its causes.
- Q20. Match the following
- | Column A         | Column B                                |
|------------------|---|
| A. Flood         | i. loss water by plant.                 |
| B. Drought       | ii. Changing of water into water vapour |
| C. Condensation  | iii. Excessive rain                     |
| D. Evaporation   | iv. Low or no rain                      |
| E. Transpiration | v. changing of water vapour into water  |
- Q21. Fill in the blanks with suitable words.
- Water is \_\_\_\_\_ for life.
  - Most of water available to us as \_\_\_\_\_ water.
  - Loss of water in form of water vapour through plant is called \_\_\_\_\_.
  - Wet clothes dry up in sun due to \_\_\_\_\_.
  - Water is a \_\_\_\_\_ of hydrogen and Oxygen.
- Q22. What is water cycle? Why it is essential?
- Q23. Why there is a need for conserving water?
- Q24. Write three uses of water?
- Q25. Sea and ocean contain plenty of water, although it cannot be used by human use? Discuss.
