

Class: 9
Subject: Biology
Topic: Tissues
No. of Questions: 20

- Q1. Which tissue protects the entire body?
- Q2. Give one example of connective tissue in which matrix is solid?
- Q3. Name one structure in your body, which bears ciliated epithelium.
- Q4. What is aerenchyma?
- Q5. What is the utility of tissues in multicellular organisms?
- Q6. Identify the type of tissue in the following?
1. Skin -
 2. Bark -
 3. Bone -
 4. Lining of kidney tubules –
 5. Vascular bundle -
- Q7. What will happen if apical meristem is damaged?
- Q8. What are the components of phloem?
- Q9. Name the tissue which allows easy bending in various parts of a plant.
- Q10. Which structure protects the plant body against the invasion of parasites?
- Q11. Name the enucleate thin walled plant cells with perforated end walls.
- Q12. Based on ability to divide, how many types of plant tissues are found?
- Q13. What is the function of xylem?

- Q14. What is lignin.
- Q15. Who coins term tissue? What is histology?
- Q16. Name the part of phloem with perforated walls.
- Q17. Name the dead part of phloem.
- Q18. What are companion cells and are associated with what?
- Q19. What do you mean by differentiation?
- Q20. What is the role of epidermis?
